## NSE100-RN/RL

The innovative modular screw jack system from Nozag, allows for perfect drive solutions from low cost standard components. The kit is subject to the highest standards of functionality, quality and design. With little effort, very much can be moved and still, the investment, maintenance and operating costs are kept within narrow limits.

Screw jacks developed and produced by Nozag, solve these tasks in a simple and cost efficient manner.

#### **Specifications**

100 kN (10000 kg) Maximum lifting capacity:

Maximum driveshaft speed: 1500 min-1 (higher on request)

Spindle: TR 60/9 (standard)

#### Material

Material (housing): Aluminium Lubrication: Grease

### Weight

16.70 (with grease / without spindle) Screw jack weight:

Spindle weight: 19.00 kg/m

	Basis	Uptions
Spindle length		
Stroke:		
Safety clearance (spindle pitch)	+ 9	
Basis length	+176	
Flange nut (FM)		+ 90
Duplex nut (DMN)		+ 90
Safety nut (SFM)		+ 45
Safety clearance (spindle pitch)	+ 9	
Pin		+ 45
Compressed length of bellows above nut		
Compressed length of bellows beneath no	ut	

#### **Compressed length of bellows**

Overall length of spindle

Stroke/26.0 = ...... × 2,0 = ..... (round number)

#### **Features**

Туре	Ratio	Stroke per revolution	Driving torque <sup>1</sup>	Max torque	Drive through torque <sup>2</sup>
	i	mm	Nm	Nm	Nm
NSE100-RN	9:1	1.00	F(kN) x 0.59 + 1.68	60.20	315
NSE100-RL	36:1	0.25	F(kN) x 0.19 + 1.02	20.20	315

<sup>1)</sup> Factor includes efficiency, ratio and safety 1

<sup>2)</sup> By more that six gearboxes in series, please contact our technicians

# Load case

Determine, In the diagram (safety 1), with the corresponding load case (1/2/3), the intersection of the buckling force F and free spindle length L. The intersection point must lie below the boundary line of the chosen spindle diameter. If not, a bigger spindle, respectively, the next larger gearbox is to be selected.

#### **Critical speed**

#### Load case

Determine, In the diagram (safety 1), with the corresponding load case (1/2/3), the intersection of the buckling force F and free spindle length L. The intersection point must lie below the boundary line of the chosen spindle diameter. If not, a bigger spindle, respectively, the next larger gearbox is to be selected.

We reserve the right on printing and dimension errors, as well as technical changes and improvements. CAD files can be downloaded at www.nozag.ch.

#### **Attachments**

- Spindle
- 2 Flange nut
- 3 Duplex nut
- Pendulum nut adapter 4
- 5 Carrier flange
- 6 Flange bearing
- 7 Suspension adapter for gearboxes
- Suspension adapter for flange nut
- Shaft cover
- 10 Bellows
- 11 Spiral spring cover
- 12 Lubricant dispenser
- 13 Hand wheel

#### **Drive components**

- Coupling
- 2 Clamp coupling
- 3 Connecting shaft
- Pedestal bearing
- Bevel gearboxes

#### **Motor mounting**

- Motor adapter
- 2 Motor/brake motor
- Rotary pulse encoder
- Spring brake

Refer to the catalog, program system 2010, for attachments, drive components and motor mountings.

### Available on request:

- > Double-threaded trapezoidal screw
- Ballscrew
- Stainlesssteel spindle (INOX)
- Surface-treated spindle
